## Customer Reviews

This book is a must read for parents with children, of all ages, who plan to send their kids to college. In understandable terms, Hupalo and Mazareas, have demystified the college finance and admissions process with easy-to-follow steps to college finance self-sufficiency. This is a go-to

resource for parents and college planners alike. It's never too late to read this book and plan, as I have learned personally.

Easy-to-read and quite instructive, this comprehensive book can be a big help to parents and grandparents concerned about the exorbitant costs of college. Tax-advantaged savings plans, student loans, and scholarships are all covered in detail. Do you know, for instance, how having a 529 savings plan affects eligibility for financial aid? This book addresses that question. I was surprised that the book covers more than just the financial aspects of college. Included are how to get into the university you desire, with lots of useful hints, and details as to how schools evaluate applicants. For example, it describes what universities look for in an applicant's essay. I did not expect that kind of help in this book. One downside to the book: If your children have already completed college, you may read it and feel bad about how you should have done things differently. But don't dwell on past mistakes. Give the book to someone for whom the advice is not too late!

As a financial advisor of 20 years, I found this book to be an ideal balance of easy to read, substantial range of information, and helpful at the same time. Well written! I intend to buy several to hand out to my clients who have children or grandchildren heading to college.
